Claim Objections

1. Claims 1,2,4-12 are objected to because of the following informalities. In claim 1 line 5, claim 2 line 5, claim 4 line 3, claim 9 line 5 and claim 10 line 2, it appears that "a" should be inserted before "non-rotatable". Appropriate correction is required. Accordingly, in claim 5 line 5, "a non-rotatable" should be changed to "the non-rotatable", and in claim 6 line 3, "the" should be inserted before "non-rotatable"

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 2 lines 8 & 9, "the pin" lacks proper antecedent basis and should probably be changed to "the pin means".

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-6,8-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Pippins (5,337,495).

Art Unit: 3671

Pippins discloses an assembly for operatively attaching a wear member to a support structure comprising a pin retainer 41 and pin means 33. Concerning claims 9-12, given the structure of Pippins, the claimed method steps would inherently be performed while using the assembly as disclosed by Pippins.

Allowable Subject Matter

4. Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art of record discloses wear member attaching assemblies.
